

Spotlight on deaf artists

The deaf sculptor Douglas Tilden said that "There is no other field in the struggle of life which can do more for the deaf than art, to secure recognition from the public and through this bring them upon common footing." And although there have been a number of deaf artists who have merited recognition, relatively few have received public acclaim.

From Sept. 18-Oct. 2, the works of seven prominent deaf artists are being highlighted in an exhibit in the Learning Center. These artists span more than 200 years and represent the major visual arts disciplines—painting, sculpture, printmaking and photography.

The exhibit which has been organized by the Office of Fine Arts in Education includes the works of Francisco de Goya (1746-1828), John Brewster (1766-1854), Theophilus Hope d'Estrella (1851-1929), Douglas Tilden (1860-1935), Cadwallader Washburn (1867-1965), Granville Redmond (1877-1935) and Morris Broderson (1928-).

Francisco de Goya, the best known artist in the group, will be represented by three of his graphic works, which are now part of Gallaudet's permanent collection. Goya, a biting satirist who became deaf in his forties, ranks along with Durer, Rembrandt and Picasso as one of the world's leading printmakers.

Also well known as a printmaker is Cadwallader Washburn. Although a prolific artist, Washburn, who was a graduate of Gallaudet College, was a man of many interests and talents; during his long life he also was a war correspondent, oologist, entomologist, world traveler and explorer.

Traveling, though of an entirely different nature, was an integral part of the life and career of the 18th century

artist John Brewster. Brewster was an itinerant portrait painter in New England who had little formal training and, like other folk art painters, is generally referred to as a "primitive" artist.

The West Coast has also spawned deaf artists of national and international repute. Among them were Douglas Tilden who was the first California-born sculptor to receive recognition outside of the United States. The plaster model of his *Baseball Player*, a bronze casting of which is in the Gallaudet exhibit, was accepted in 1889 by that hallmark of 19th century artistic success, the Paris Salon.

Like Tilden, Theophilus Hope d'Estrella also studied in Paris. At the age of 35 d'Estrella turned to photography and spent many summers photographing the natural beauty of California. Among his strongest images are those of his beloved students at the California School for the Deaf at Berkeley.

The painter Granville Redmond also realized the intense beauty and uniqueness of the California landscape which was to be the preoccupation of his artistic career. Redmond, who also acted in several Charlie Chaplin films, is now being recognized as having a leading place in the California landscape movement of the early 20th century.

The contemporary works of Morris Broderson are also represented. Broderson's works are highly personal and introspective and have at times an almost surreal quality.

This group show in the Learning Center will be followed by more in-depth exhibition in various locations throughout the campus of the works of Tilden, d'Estrella and Broderson. Everyone is invited to stop by the Learning Center to view the exhibit.

Student Union Director Sue Lyon, President Merrill and SBG President Mike Ubowski prepare to bowl after helping cut the ribbon to open the new Recreation Center in Ely. Hours of operation are now Monday-Saturday from 6-10 p.m. but an official schedule will be adopted soon.

Interpreter office expanding

With the hiring of two new interpreters in August, the Interpreter Referral Services office is expanding to better serve the needs of the campus community.

Central Administration last fall approved an expansion of IRS. Previously, many interpreters used at Gallaudet have been free-lance people hired for a specific program or event.

Now, Gallaudet's full-time interpreters will only serve the campus, although they can accompany Gallaudet people off campus if necessary. Other full-time interpreters may be hired in the future. "From these new interpreters we can assess the needs of Gallaudet," said Sheila Grenell, coordinator of IRS. "It will give us an idea of how many people we really need."

It is hoped that by having regular interpreters on campus, deaf faculty and staff will become accustomed to them and it will facilitate their working together. It is also hoped that by hiring regular campus interpreters, the cost to departments can be cut. All of the interpreters hired by Gallaudet will be Comprehensive Skill Certified.

Gallaudet's interpreters will work a 40-hour week, and work schedules will be staggered to include evening hours. Departments will be billed for their use of full-time staff at an hourly rate. If the demand for full-time interpreters exceeds the supply, IRS will try to provide qualified free-lance interpreters at the lowest possible rate. Two days' notice is still required for persons requesting interpreter services.

In addition to doing some interpreting herself and providing inter-

preters for campus meetings, lectures, seminars, conferences or "anything that needs an interpreter on campus," Grenell is responsible for trying to find interpreters to fill the needs of the surrounding community. The Interpreter Referral Services office, which is administratively under Demonstration Programs in Gallaudet's College for Continuing Education, is the only interpreter referral service in the area which serves DC, northern Virginia and parts of Maryland. An interpreter referral service in Catonsville, MD serves the Baltimore area and northern Maryland.

About 200 interpreters in the DC-Maryland—Virginia area, both certified and non-certified, both full-time and part-time, are registered with IRS. The certified interpreters are certified through the local Potomac Chapter of the Registry of Interpreters for the Deaf and are given periodic evaluations. Of those registered with IRS, however, there are only about 75 hard-core interpreters that IRS uses regularly, said Grenell.

Although requests for interpreters off campus have been declining since the Reagan administration came in, she noted, interpreters are still in demand, especially at colleges. IRS provides interpreters for Gallaudet students going off campus or for Consortium students coming to Gallaudet. Other universities in the area call IRS if they need interpreters "and there are not enough interpreters to fill all the classes," said Grenell.

Grenell has been working with the National Registry of Interpreters for the Deaf in Silver Spring to set up a cen-

Students gather for the opening of Ely's new Recreation Center which features six automatic AMF bowling machines and a game area that includes electronic pinball and video games.

Serendipity

Library Bits & Pieces

New books

by Diana Gates

Summer vacations are over and everyone is settling into a routine. Perhaps you have been wondering about the Library's new books. With new books arriving constantly, it is difficult to mention all of those that have arrived through the summer. A few of the more interesting ones are included here.

Not only do books provide information about life in the past, but illustrations also sometimes reveal more than the written word. Two such works are *American Folk Painters of the Three Centuries* and *American Image: Photographs from the National Archives, 1860-1960*. *American Folk Painters* (DEAF 759.13 A4 1980) is a catalog of the exhibition organized by

the Whitney Museum of American Art, New York, Feb. 26-May 13, 1980. Thirty-five American folk painters of the 18th, 19th and 20th centuries are presented; their works follow a biographical essay. Of particular interest to the Gallaudet community may be artist John Brewster, Jr. (1766-1854). A deaf man, Brewster was a classmate of Alice Cogswell at the Connecticut Asylum for the Education and Instruction of Deaf and Dumb Persons.

American Image (779.942 U5a 1979) is a collection of 250 photographs from the intensive collection of the National Archives. The photographs represent a study of America's past life by portraying its customs, ideals, philosophies and growth of the nation. The contents of the book, beginning with the Mathew Brady collection, include the Civil War, turn of the century, World War I, the Depression, World War II and the post-war years to the late 1960s.

With the latest tax bill passed, it is possible that you still may have overlooked some extra tax savings. *Everybody's Guide to Tax Shelters* by Stuart Ober (343.7305 03e 1980) discusses tax shelters versus nonshelters, tax breaks with bonds, life insurance as a tax shelter, IRA and Keogh retirement plans, taxes and the single, widowed or divorced woman and much more.

With autumn here it's not too late to begin a hobby in astronomy. Two recent acquisitions, *The Amateur Astronomer* by Antonin Rukl (520 R8a 1981) and *Pictorial Guide to the Planets* by Joseph Jackson and John Baumer (523.4 J3p 1981) may help you. *The Amateur Astronomer* includes information about the stars, planets and comets. Visibility with the naked eye or with the aid of binoculars or a telescope is discussed. *Pictorial Guide to the Planets* not only discusses information on the planets, moon, comets and asteroids but also includes theories of the systems' origins, possibility of life on other planets, principles and problems of rocketry and space travel.

New acquisitions can be found in the "New Accessions" list in the COM Catalog. The list is revised every two months. This list is also accessible on SIRE, the Library's computer database. The new books are displayed in the lounge area on the middle level of the Learning Center. New books on deafness are set up in the Deafness Collection on a special display table.

DC Public Schools Superintendent Floretta McKenzie talks with President Merrill and 5th District Police Officer David Chapman at the GCRC meeting.

New DC Superintendent of Schools attends Sept 9 GCRC meeting

Floretta McKenzie, the new superintendent of public schools in Washington, DC, attended the first meeting of the Gallaudet Community Relations Council for the 1981-82 academic year. She told Council members and their guests that she was looking forward to getting on with the business of education, "still the only vehicle of upward mobility that we have."

The meeting, held the evening of Sept. 9, was an information sharing get-together which attracted not only

GCRC members but others from the Far Northeast community and the Gallaudet campus as well.

As the organization composed of leaders from the local community and representatives from Gallaudet began the work of the new year, Gallaudet President Edward C. Merrill, Jr. welcomed them once again to the campus with the comment: "As I look back, I can't understand how we at Gallaudet ever got along without the GCRC."

Both Merrill and Kurt Schneidmiller, director of Planning at Gallaudet, asked the support of the GCRC as Gallaudet faces a heavy influx of students deafened by the rubella epidemic of 1963-65. The GCRC passed a motion supporting the petition to the Board of Zoning to build a new dormitory on campus.

The Rev. Stanley Barry, director of the H Street Project Area Committee proposed new boundaries and new ceilings for home improvement loans, one of the major projects of the GCRC.

Staff sign language classes are beginning

Sign Language Instruction for Gallaudet Employees classes begin today, Sept. 21. If you would still like to register, contact Lynn Jacobowitz at x5662 or x5668, voice and TDD. Application forms are available in the Learning Center, Upper South 21.

Faculty Research

Described in this column are research projects that received assistance from the Office of Faculty and Graduate Student Research. For more details on projects discussed, contact Clarence Williams, Division of Research, x5030.

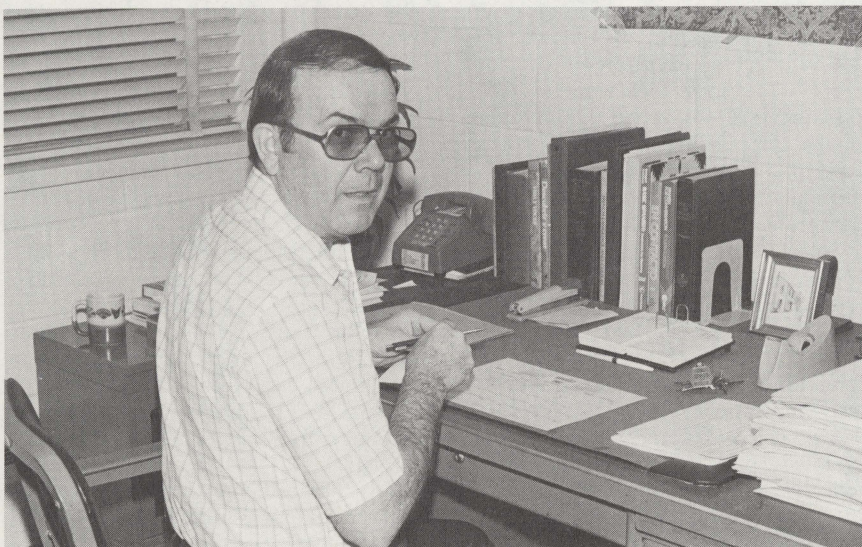

Sex knowledge of deaf college students

Jim Achtzehn, a faculty member in the Department of Education, recently completed an investigation of the assessment of deaf college students in the area of sex knowledge.

Using a modified true-false sex knowledge test developed by McCary (1974), Achtzehn sought to determine which version of the test—original English, syntactically modified English or sign language—would yield higher scores among deaf college students, or if the information covered by the test was too difficult.

The study did not show that a syntactically modified English language version or a sign language version could be more effective with deaf college students than the original English language version. Neither the modified nor the original English language version were found reliable with college students who were hearing impaired. An analysis of interviews with the deaf subjects indicated that the true-false statements on the tests were often misunderstood and that the information measured was too difficult.

The project highlighted the need for further research on sex knowledge of hearing impaired college students.

John Delaney is a professor of Romance Languages.

Sponsored R&D

Grant/contract deadlines

Provided below are application deadlines of selected federal programs that offer potential grant or contract opportunities for Kendall Green faculty, staff, and graduate students. More details on programs of interest can be obtained from the Office of Sponsored Research, x5030 (voice or TDD).

Deadline	Program
10/06/81	Ed/NIE—Postsecondary Education Research
10/12/81	NEH—Humanities Studies Summer Stipends
10/15/81	OSE—Handicapped Personnel Preparation
10/25/81	NSF—Mathematical Science
11/01/81	NICHD—Research for Mothers and Children
11/03/81	OSE—Model Programs for School Aged Handicapped Children
11/08/81	OSE—Handicapped and High-Risk Youth
11/13/81	OSE—Division of Innovation & Development, Research Projects Branch—Student Research Related to Education of the Handicapped
11/15/81	NSF—Handicapped in Science Program
11/17/81	OSE—Handicapped Early Childhood Assistance

Family environments proposal funded

A research project for "A Study of Families and Their Learning Environments for Deaf Children" has been funded by the Office of Special Education, Department of Education.

The proposal was submitted by Barbara Bodner-Johnson, assistant professor with the Department of Education, who will be the project director. The project has been funded at \$66,751 and is slated to begin this month.

The relationship between the deaf child's family environment and his or her academic achievement will be studied. Interviews will be conducted with a large number of families of deaf 10-12-year-olds. Areas of information to be collected include onset and diagnosis of hearing impairment, communication mode, parents' acceptance of their child's deafness and child rearing practices. Professionals will be able to apply findings of this research to consult with parents of deaf children in an effort to change and control certain identifiable factors in the home that affect the deaf child's educational development.

Marilyn Sass of the Department of Education faculty will serve as research associate.

MSSD begins new season

The Model Secondary School for the Deaf welcomed 88 new students and their parents for two days of orientation Sept. 8 and 9.

The familiar sight of suitcases and bundles, bewildered parents and excited students heralded the beginning of the new school year. Parents and students were welcomed by Dean Lee C. Murphy and Principal Mary Hockersmith at the opening session on Tuesday in which they reassured parents that their sons and daughters were in good hands.

"We are trying to lead your young people into becoming adults," Murphy told them. "I hope we can work together to develop thinking, decision-making adults."

Hockersmith stressed MSSD's goal to have all students achieve independence, "and we realize that it's sometimes harder for parents to let them have that responsibility. We allow the students to make their own mistakes, but hopefully we are there to pick them up, dust them off and help them learn from their experiences, good and not so good."

One half of the new students come from MSSD's primary service area of Virginia, Maryland, Delaware, Pennsylvania, West Virginia and the District of Columbia; the other half come from 30 states across the U.S. as well as two exchange students who come from Sweden and Belgium. MSSD's total enrollment for this school year is 425 students.

The aim of the two-day program was to orient parents, as well as students, to MSSD. Parents and students attended presentations on the Educational Planning Process, Residence Hall Programs, Communication, Deaf Awareness, Public Law 94-142 and received information and materials from other offices.

On Wednesday, parents and students followed a simulated class schedule, changing classes each half hour. Most parents said they were exhausted after that experience but were grateful to have the chance to meet with teachers and get an idea of the classes their sons and daughters would be attending.

Following a festive cook-out lunch where students from MSSD's student leadership program did the cooking, parents attended a panel discussion.

Parents receive information about the Security Department at their recent orientation at MSSD.

Administrative changes at MSSD

Hockersmith

Fones

Hobbs

A number of administrative changes have taken place at MSSD recently.

MSSD has three new administrators in the principal's office. Dr. Mary Hockersmith is MSSD's new principal. She joined MSSD in 1969 and has held positions with MSSD as audiologist, speech pathologist, coordinator and supervising teacher. She assumed the role of acting principal from November, 1980 until the end of the 1980-81 school year. She completed her EdD in Human Development and Counseling at George Washington University last year.

Nancy Fones, former director of College Educational Resources' Instructional Development and Evaluation unit, is MSSD's new assistant principal for Curriculum. In this role she will see that MSSD's 24-hour curriculum is planned, written, implemented and evaluated. She has taught special education students, has taught school personnel how to design curricula and has taught administrators how to evaluate personnel in the state department, university and business settings.

Peter Hobbs is MSSD's new assistant principal for Programs. He will help administer the day-to-day operation of the school. He has served MSSD as a social studies teacher, diagnostic prescriptive teacher and as a team

leader in the Educational Planning Office. He holds master's degrees from both Duke University and George Washington University.

MSSD Dean Lee Murphy has added Nancy Cowan and Rich Lytle to his administrative team. Cowan is assistant to the dean and is responsible for admissions, parent education, facilities, professional development and miscellaneous administration. She earned her PhD in Human Development from the University of Maryland, her MA in Counseling from West Virginia College and her BA from DePaul University. She joined MSSD in 1975 as a communication specialist and later served as department chairperson for Communication. Most recently she was associate principal responsible for curriculum development and the Educational Planning Office, which she developed and implemented.

Rich Lytle has been at MSSD for 10 years, most recently as dean of Students. He is now assistant to the dean for Planning and Special Projects and is responsible for coordinating the new Reality Therapy program, the MSA accreditation follow-up and several other new projects. Lytle earned his MS in School Administration from the University of Maryland and his BA in History from the University of California.

Other new administrators have been named to the Residence Program. Richard Pelletier is acting director of Student Life and Tim Frelich is program supervisor for the Residence Program. Pelletier has been with MSSD for five years as resident advisor, assistant dean of students and as transitional classroom teacher. In his new position he is responsible for the Residence Program and the Clinical Support Service area. Tim Frelich was resident advisor and last year served as recreation specialist at MSSD.

Cowan

Lytle

Personalities

Carlie Bunch is a new interpreter with Interpreter Referral Services. She attended the University of North Carolina at Chapel Hill and her parents are deaf.

Bernadette Coughlin is also an interpreter with IRS. She has a BS in Speech Pathology and previously worked as a speech therapist for Brooke County.

Bunch

Coughlin

Janice Rosen is an instructor with the English Department. She worked as a tutor with the Gallaudet English Department from 1978-80 and has her BA in Psychology from Gallaudet and M.Ed in Education of the Deaf from Western Maryland College.

Vicki Jo Kemp is an instructor with the Mathematics Department. She has worked at Gallaudet as a temporary instructor since 1977 and previously taught at York and Lancaster County Day Centers in Pennsylvania. She has her BA in Math from Gallaudet and M.Ed from Western Maryland College.

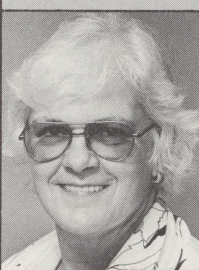

Rosen

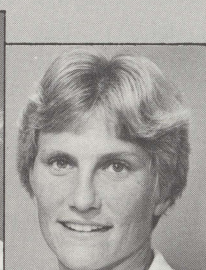

Kemp

Mary Malzkuhn is an instructor with the Government Department. She held a temporary position in this department for four years and has her BA and MA from Gallaudet.

Robbie Carmichael is an instructor with the Physical Education Department. She recently received the gold medal in doubles and the bronze in singles tennis in the Deaf Olympics. Carmichael received her BS in PE and MA in Education of the Deaf from Gallaudet and has previously worked as an assistant coordinator, counselor and recreation leader with recreation and children's summer programs.

Gallaudet College is an equal opportunity employer-education institution. Programs and services offered by Gallaudet College received substantial financial support from the Department of Education.

Policies & Benefits

New dental rates

Because of the high use of the dental insurance by both employees and dependents, the premium rates for dependent dental insurance will increase effective Oct. 1, 1981.

To offset some of the impact of the overall increase, the College will be able to offer a new Split Rate Premium for Dependent Coverage. This new arrangement will mean that an eligible employee with only one dependent will pay less for dependent dental coverage than an employee with several dependents. The rate for one dependent will be \$6.19 every pay period, while the rate for more than one dependent will be \$11.49 every pay period.

Through Oct. 1 there will be an open enrollment period when all currently eligible employees can enroll for dependent dental insurance with no penalty. Also during this time all eligible employees can change to the Split Rate if they desire.

Enrollment cards are available at all dental claim form pickup locations plus at the Personnel Office, Room 7, College Hall.

Deaf Action Week volunteers needed

Deaf Action Week will be observed on Dec. 8 at the Gaithersburg, MD Regional Library and on Dec. 10 at the Martin Luther King Memorial Library in DC.

At both libraries, Alice Hagemeyer, librarian for the deaf, will introduce special guests such as library officials, Miss DC, Miss Maryland and NAD and MAD officials. Deaf writers in the area will participate in a panel discussion.

Both programs are being sponsored by Friends of Libraries for Deaf Action of the National Association of the Deaf. Interpreters will be provided for hearing people at both programs, and non-signing people with hearing loss will receive communication aids. Assistance will also be provided for deaf-blind participants.

Volunteers are needed to assist at the programs. Persons interested in serving on the planning committee can attend planning meetings which are tentatively scheduled for Oct. 5 at 4 p.m., Oct. 7 at 7 p.m. or Oct. 9 at 9 a.m. The meetings will be held at Gallaudet.

For further information or to sign up to serve on the planning committee, leave your name, address and phone number by calling 727-2255 TDD only.

Subtitled German films playing at Biograph

A series of new German films representative of the New German Cinema is now playing at the Biograph Theatre on M Street through the end of September. All of the films are subtitled in English.

The schedule is:

- Sept. 21-22—"Even Dwarfs Started Small" and "Calm Prevails Over the Country."
- Sept. 23-24—"Nosferatu: The Vampire" and "Jonathan."
- Sept. 25-27—"The American Friend" and "Alice in the Cities."
- Sept. 28-29—"Kings of the Road" and "The Goalie's Anxiety at the Penalty Kick."

Sheila Grenell is coordinator of Interpreter Referral Services.

IRS

continued from page 1

tralized, off-campus referral service. The National RID is not a referral service—it is a national professional organization that certifies interpreters through its local chapters.

The off-campus referral service, which would be a national model program-demonstration center that would work with other state interpreter referral service, would be a joint effort of the RID/National Association of the Deaf, with the assistance of Gallaudet. Although a number of government agencies initially interested in contracting with the proposed center are now having budget difficulties, Grenell and the RID are still hopeful that the center may become a reality if it can get private funding support.

The Interpreter Referral Services office is beginning a number of new projects to better serve both the campus and the community. New video and audio equipment has recently been purchased by the office, and IRS will begin making practice tapes of signing. Any interpreter registered with IRS can come in, view the tapes and be evaluated so that their skills can be matched to the needs of persons requesting interpreters.

IRS also plans to work with

Gallaudet Television to provide interpreters for announcements and other important events. It is hoped that the television studio can tape some programs with interpreters which can then be shown in the campus cable television.

The office hopes to begin working soon with the Personnel Office to set up a training program for new secretaries in the area of telephone interpreting or interpreting for a deaf boss. Gallaudet's full-time interpreters would be available to conduct trainings at various offices requesting assistance in this area.

IRS would also like to help acquaint new employees with the use of interpreters. "A lot of people are really intimidated when they first encounter an interpreter," said Grenell. "They just don't know what to do with a third person there."

IRS is also continuing to use students in the Associate of Arts program in interpreting to accompany Gallaudet students to classes at other colleges. Second-year AA students, as part of their practicum work, are helping to fill the need for classroom interpreters.

The Interpreter Referral Services office is located in the Gatehouse near the 7th Street entrance to Gallaudet. Interpreters can be requested by calling x5634.

French conference on deafness scheduled

In commemoration of the International Year of Disabled Persons, the National Association of the Deaf of France will be sponsoring an International Conference Oct. 5-8, 1981, in Paris. The theme of the Conference is "Deafness and the Noisy Society and the Mass Media."

While Gallaudet College will not be sending an official delegation, the International Center on Deafness will be happy to supply you with more information. You can contact the International Center at x5316.

Church service set

The All Souls Church at 16th and Harvard St. NW is holding a special service in celebration of the International Year of Disabled Persons. The service, which will be interpreted, is scheduled for Sunday, Sept. 27 at 11 a.m. It is sponsored by Independent Living for the Handicapped. The Rev. David Eaden is the host. All persons from Gallaudet are invited to attend.

Doreen Feerick is a secretary with the Gallaudet College Library.
